Asia Pacific Rim Universities, Sustainable Cities and Landscapes Hub
2018 Conference  The University of Hong Kong  (September 6-9, 2018)

APRU-SCL conferences provide opportunities for academics and experts from different regions, cultures and disciplines around the Pacific Rim to explore and collaborate on common sustainability challenges and to develop responses that can foster transformative change within cities, and between cities and their surrounding landscapes.

This year’s conference has a focus on agency, advocacy, and action orientated research, and will be structured around 12 thematic working groups:

- Productive cities, infrastructural ecologies
- City-landscape sustainability
- Urban biodiversity
- Urban renewable energy
- Sustainable urban design
- Urban water and sanitation
- Urban-rural linkages
- Transitions in urban waterfronts
- Vulnerable communities
- Landscape and human health
- Waste
- Smart Cities

If you are interested to participate, details and application forms can be found on the website. Deadline for applications – 31 May 2018
