Mellissa Withers, Judith McCool (Eds.)

Global Health Leadership

Case Studies From the Asia-Pacific

- Brings together an international group of experts in global health from many disciplines and countries through the Association of Pacific Rim Universities (APRU) network
- Presents real-world, very recent case studies that help illustrate global health leadership in practice
- Includes a series of questions in each chapter that are designed to spark conversation, debate, and thought, as well as some additional recommended readings
- Includes chapters examining hot topics, such as international treaties and governance, health diplomacy, the role of private industry in health promotion, social entrepreneurship, and community engagement in health
- Highlights timely topics such as tobacco control, noncommunicable disease prevention, outbreak investigation, disaster preparedness, etc

This timely book serves as an overview of the challenges in global health leadership from multiple perspectives, bringing together an interdisciplinary group of academics, researchers, and leaders from around the world who are conducting innovative and high-quality research in the field of global health (GH). The book helps illustrate theoretical and conceptual ideas of leadership using recent examples of GH challenges from the Asia-Pacific region.

Leadership is an important element of education and training in GH. Leadership can be demonstrated by many sectors, including local and national government, intergovernmental and non-governmental organizations, multilateral organizations, civil society, and private individuals and corporations. The cases included in this book provide an analysis of the major components to successful efforts in GH, including cooperation, cultural competency, vision, and community ownership.

Given that GH practice is typically conducted in team settings with members from various backgrounds, this book provides students, faculty, and professionals in public health and related fields with an opportunity to examine multiple examples of leadership in different contexts. Readers learn how leaders have overcome challenges faced in the operationalization of complex health interventions, foreign policy, and working with key stakeholders and organizations.
