

# Digital Transformation Wave Asia Pacific Should Strengthen STEM Education

Cultivate the new channels of the new science to attract  
professionals

Executive version 2019/03/12

---

With the emergence of digitalization, automation concepts and systems, new jobs and skills needs in various industries have increased, and there have been concerns about human beings being replaced by machinery.

The Hong Kong University of Science and Technology School of Business Administration and the Association of Pacific Rim University publish the "21st Century Asia-Pacific Work Transformation" report, analyzing the Asia-Pacific region, including Hong Kong in the face of digital
