

Which of the following technologies do you use to support student learning?

What other categories of technology do you use for online and remote teaching?

Why do you use technology to support student learning?

Engagement

easy to track

Because it enables active engagement

Shift online made this mandatory

Unable to meet students face to face due to safe distancing

Because of the pandemia. But also because I think we could improve the knowledge

For synchronous discussions

The students are from different parts of Chile so far

easy access to online materials

Why do you use technology to support student learning?

To engage students better in an online learning, that's what students of this century love

no choice because of lockdown easy to score exams

Virtual by safe distance

convenient to use LMS, have several capabilities eg grades, communication is easy, everything is in the LMS, syllabus, assignments, submissions

Shift to online learning because of pandemic

Students are more adapted to this mode.
