

APRU SWM GLOBAL ESG LECTURE SERIES 2023

How to rehabilitate resilient ecosystems in mined landscapes?
The importance to integrate ecology into engineering

The APRU Sustainable Waste Management Global Lecture Series is designed to provide a sound foundation for basic principles and unify research across ecology toward conservation, environmental health, and waste management, focusing on sustainability and Environmental, Social and Governance (ESG)

21ST DECEMBER 2023
9.00 AM - 10.00 AM (KST)
