### GLOBAL SUSTAINABILITY: WASTE & THE CITY

*An APRU course with a focus on SDGs and ESG*

#### **APRU Course Director:**

Sierin Lim, Nanyang Technological University, Singapore

#### **APRU Program Directors:**

Yong Sik Ok, Korea University, Sustainable Waste Management  
Yekang Ko, University of Oregon, Sustainable Cities and Landscapes

The seminar course introduces graduate students to global sustainability concepts and applications from leading experts in the academia and the industry. Students will learn the key points of the United Nations Sustainability and Development Goals (UN SDGs) focusing on the environment and economy, specifically those that pertain to waste and urbanization. They will also learn how leaders work with key stakeholders in implementing sustainability in their organizations. By exposing students to real-world Environmental, Social, and Corporate Governance (ESG) reports produced by corporations in various industries, they will practice critical thinking and analytical skills.

The course will provide students with the opportunities to interact with leaders from around the world in real-time video conferencing. By conducting the case studies in teams with peers from across institutions and regions, students will develop professional competencies in cross-cultural communication, interpersonal skills, teamwork, while fostering equitable and inclusive partnerships. The course will prepare the students for future exchanges with members from various background and cultural contexts.

This course is hosted by Nanyang Environment and Water Research Institute (NEWRI) under NTU Graduate College Interdisciplinary Graduate Programme (IGP/Global) and offered in collaboration with APRU Sustainable Waste Management Program (Korea University) and APRU Sustainable Cities and Landscapes Program (University of Oregon).
